THE REMAINING ISSUES AND MYSTERIES OF THE ASSASSINATION ATTEMPT ON TRUMP

From the Jesse on Fire Show

Crooks Seen Clearly Walking on the Roof

We are experiencing the most economically unstable period and socially erratic period in the history of the modern world. This period is being marked with extreme fluctuations in the stock, commodity and currency markets accompanied by severe and sometimes violent and deadly social disruptions including historic pandemics, conflicts, wars, riots and even regime changing coups. As is typical of such times, many fortunes will be both made and lost during this period. After talking with many business owners, executives, professionals, scholars and government officials from around the world, the writer believes that for the financially astute investor, this is a time of unprecedented opportunity given the global trade unbalances and distortions in the commodity and currency markets that exists. The *Financial Crisis Report* is a free compilation of the opinions of David Miyoshi as well as of those advisors he himself subscribes to (with appropriate credits given) on how to survive and even benefit during this historic time of crisis in the world. The writer receives no compensation of any kind from any advisors whose articles or ideas may appear in this report. The reader is welcomed to check on all sources of information mentioned herein. Because the opinions and observations of this writer and other advisors are provided herein without charge, the reader is asked to make his/her own judgment on the contents.

This article is a continuation of the comments I found on alternative media that were suppressed by the mainstream media concerning the unanswered issues in the attempt to assassinate Donald Trump.

This article is rather long and will take up most of this month's newsletter. I don't anticipate I will be able to locate much further information on this attack, as the investigation is being shut down and as the many consuming events that are soon predicted to occur before the election do happen, they will overshadow this tragic event.

As I mentioned in the previous August article, most of the factual information about this shocking event would be available for a brief period after it happened. But once the government agencies began investigating and controlling the dissemination of information, it has become very difficult to find further factual data. The mainstream media is not covering this incident much and the alternative media is now posting questions on many unanswered and unresolved issues. I am afraid this investigation will end the same as the Kennedy Assassination investigation did, a claim of a lone shooter, many

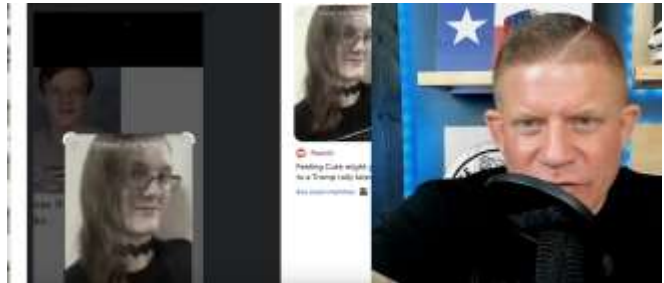

The Miracle that Changed America’s Destiny (continued)

These stills are taken from a full video of Trump speaking by a person sitting behind him. These still photos show Crooks walking across the roof minutes before the shooting begins. At this time, some people on the ground were pointing to Crooks and shouting about his presence yet there was no action taken by the police or the Secret Service. Incidentally, the position of the person who took this video is very close to where the lady (circled below) was sitting who enthusiastically took the video of Trump immediately after he fell.

Was Crooks a transvestite?

Jesse on Fire showed a photo of a woman which had initially gone viral on the internet with the claim it was Thomas Crooks dressed as a woman. But searching the internet now the photo can no longer be found. If the photo was not of Crooks, logically it would be easily found with the disclaimer that it’s a woman who looks like Crooks. Jesse on Fire says the facial features of the lady are definitely the same as Crooks. But it’s strange the photo can no longer be found. It’s another mystery surrounding Crooks.

Possibly Shot by Beaver County Police Unit

The analysis also discusses the possible 3rd shooter, believed to be a Beaver County police SWAT member, whose shot may have distracted the Trump shooter long enough for the Secret Service Hercules 1 sniper team to take their shot and kill the shooter.

News clippings of shot by ESU

the district attorney for Butler County, confirmed that a member of the county’s Emergency Services Unit (ESU), similar to a SWAT team, fired a shot at Crooks that prompted a reaction from the gunman.

Unit, said in a text message. But Goldinger said he believed the officer’s shot caused Crooks to stop firing his weapon, buying the Secret Service snipers time to kill the gunman.

Sounding Recording of ESU shot

Why the Trump Shooting is worse than we think.

Did you know that according to testimony of Ronald Rowe, the acting Director of the Secret Service, after Trump’s presidency was over the Secret Service never once provided Trump counter-sniper protection until they finally did on July 13, 2024, the day of the assassination attempt. Why was the first day the Secret Service provides Trump counter-sniper protection the same day that Thomas Crooks shows up? Could it be possible that a plan was in place that after Trump is shot by an assassin, the alleged single lone gunman who is planned to take the blame for the shooting was planned to be shot by the counter-sniper team? And why was the FBI able to promptly announce the day after the shooting that Crooks was the lone shooter, that he was a loner, that he was bullied and unpopular, all this before the FBI was even able to get into Crook’s phone. More mysteries about Crooks.

Another strange occurrence is that the July 13 rally was the FIRST time the left wing mainstream media streamed a Trump rally on TV. This is after they had imposed a long blackout of Trump events. That’s strange.

The Miracle that Changed America's Destiny (continued)

Austin Private Wealth LLC

In the previous newsletter we covered the attempted and quickly retracted short put order made on July 12, the day before the assassination attempt by Austin Private Wealth LLC, for the purchase of 15 million shares of DJT Donald Trump stock.

Jesse on Fire makes a point that if you made a list of 100 global elite companies you thought would like Trump to be taken out because he poses a direct threat to their financial interests in the world, the list would most assuredly contain Blackrock, Vanguard, the Channey Family, the Soros Family and the Rothchild family. Those entities just happen to be the largest shareholders of Austin Private Wealth LLC. This is quite a coincidence.

It is estimated that in the attempted put option trade, had Trump died, his company stock would have become worthless and the put option order made by Austin Private Wealth LLC would have made hundreds of billions of dollars.

It has now been discovered that beside this put option order on Trump stock, Austin Private Wealth also placed put options on 36 million shares of Rumble stock (it is common knowledge that Rumble stock would have also plummeted if Trump had died).

With these put option orders, if Trump died, the Dow Jones and the NASDAQ would have crashed, and Austin Private Wealth would have made an estimated \$696 billion to \$1 Trillion in profits. That would have been the largest profit made by one company in a single order in all of history.

And if Trump survived Austin Private Wealth would have lost a crippling amount of money. But they did not lose much money because they immediately pulled the order as soon as it was discovered Trump survived. The reason they gave was, the order was made in error.

Given the size of these financial bets, it is almost impossible to argue that Austin Private Wealth was not aware of the coming assassination attempt on Trump. Logically no company makes such a daring financial bet without some knowledge or belief that something is to happen to make the bet profitable.

From the Stephen Gardner show

Crooks may have been killed by a bullet from behind (not from the front)

BREAKING: Bongino EXPOSES hole in Trump Assassin Shooter Story!

Stephen Gardner recently had Jovan Hutton Pulitzer on his show. Pulitzer is an American entrepreneur and onetime treasure hunter who invented the widely-criticized CueCat barcode scanner and "kinematic artifact detection" technology to find folds and bamboo fibers in election ballots. Pulitzer is also a versed forensic investigator.

Gardner asked Pulitzer what are his thoughts on the Trump assassination attempt, and the investigation that they're doing.

Here are Pulitzer's comments paraphrased for brevity. (we apologize for the graphic nature of the photos attached below)

"I've done, so far, 8 hours of forensic analysis on the shooting. Yes, there are multiple shooters involved, but it's not like people saying there was one on the water tower, that's crap. I do not believe the kid was necessarily the bad actor. They portrayed it so I believe he would be the Patsy. I believe the shot came from behind him within his line of sight. All the forensics lead me to believe, with the delays and everything else being exactly 29 minutes when he's poised to shoot. That they stood down. I think it was all intentional. It concerned me when President Trump went the other day and spoke at the National Broadcast Journalists Association because they delayed that one exactly 29 minutes. Most people didn't pick up on that, and so I worried that something was wrong. I think they're going to try it again. I really do. I pray for the president, but I think they're gonna try it again. If they don't try it again, they're probably going to try something at the DNC and blame it on us. But we are getting more information and thank God for Twitter and Thank God for what Elon Musk did in opening that up. Because we can see with our own eyes.

But you know what. Here's the deal, folks. Don't worry if there was another shooter. You shouldn't be focused on a shooter, JFK style trying to solve this. You know you should be focused on why there so many failures allowed to happen. They're going to serve you little things to run in a rabbit hole. And if you let your mind get wrapped up with all the details such as the exact angle, the exact time and you add them all up to 137 divided by 21 you get etc., etc. Stop that crap. Focus on one thing. It was allowed to happen due to breach and protocol and secure security failures. Always focus on the government. Keep your head there because they're trying to get your head other places. And that is called the dilution protocol, which is what they put into effect.

Yeah. It is very suspicious, right? There could be two people shooting from a very similar angle. One of them happens to be dead.

The Miracle that Changed America’s Destiny (continued)

You'll never get answers out of that person. How convenient, right? I'm still waiting to see the forensics on the autopsy of the kid because his front teeth were blown out. Now let me say that again, his front teeth were blown out. Not in. And then if it was a headshot there would be pink matter all over but not much blood.

and the blood trail from his head goes another 30 feet down and off the building. You don't bleed out if it's a kill shot, there's no blood in a kill shot. That's how you know. How did he bleed out?

There is a steady line of blood from the body. And he was found 20 feet down from the crown of the building which he had to shoot from. And if he were shot in the head, there would be pinkish white stuff. Not red.

I'm looking at his teeth right incisors numbers 9 and 10 blown out. The shot did not come from the front, it came from the rear of Crooks. This is not where the two counter Sniper Teams were located.

One of the things I said earlier is we probably need to look for a “Malvo” type concealment and if you remember that was the DC sniper shooting through the keyhole of the trunk and they just laid in the car, removed the little badge on the car and shot through it and then covered it back and laid in the trunk. There's a Malvo element to this.”

From Jesse on Fire show

FBI immediately releases news that Crooks is lone shooter

On July 13, the day after the attempted assassination, the FBI announced on the news that the suspected gunman acted alone. This was announced even before the FBI even investigated Crooks’ car, his phone, his house and his background. Why would the FBI readily make such an announcement before they were even actually involved in the investigation and therefore impossible for them to know that? Was this announcement already pre-prepared?

Based on Crooks’ online messages and actions being discovered it is becoming clear that Crooks was pro Biden, pro Democrat, pro-immigration which is contrary to the story by the FBI released immediately after the assassination attempt that Crooks was a registered Republican.

We all know the way you prove a conspiracy is to find the parties driving a coverup. Those that push a story without any proof supporting it must be suspect.

Understand we do not have any confessions by the FBI that they are

The Miracle that Changed America's Destiny (continued)

part of a conspiracy to assassinate Donald Trump. So we are simply piecing together things we do know to try to get to the truth. To avoid their being suspect in a conspiracy, the FBI and the Secret Service simply need to disclose what they do know without continually replying "we can't say because it is currently under investigation."

Continued evasiveness by the Secret Service

From the Common Sense Show

Dave Hodges shows Ted Cruz questioning the new director of the Secret Service Ronald Rowe (pictured above) about the actions of the Secret Service on the day of the attempted assassination.

Hodges who has degrees in psychology comments on how Rowe does not answer Cruz's questions and believes Rowe is a narcissist who thinks he can effectively evade questions under oath. But under questioning by Ted Cruz, Rowe was caught giving inconsistent statements.

Hodges comments that it is a common strategy for a security team who wants a person killed to simply compromise its own protection and allow actors to kill the person.

On the day of the assassination attempt, Rowe was in charge of the day-to-day operations of the Secret Service. Kimberly Cheatle who resigned was the head administrator in charge who allowed Rowe to run the operations that day.

On the stand under oath, when Cruz asked him if he had denied Trump a security detail, Rowe, lied and said he did not deny a security detail, when evidence shows he did.

There is now strong evidence to indicate that Rowe was part of a plot to purposefully weaken the security detail on that day.

Cruz asked Rowe, how many Secret Service members routinely protect Donald Trump and compare that to how many for Joe Biden and

Jill Biden (these numbers are known and are supported by records), Also how many Secret Services agents were there at the Butler site.

Rowe refused several times to answer this question saying a non sequitur that the president is the protector of the free world, etc. And Rowe finishes with I will have to get you the answer later.

From the Court Investigation Program

The Secret Service counter sniper on the roof behind Trump allegedly issued a message that appeared on 4chan stating he had the assassin in his sights but the head of the Secret Service refused to give the order to fire. It has been reported this person Jonathan Willis is no longer in the Secret Service.

From the Philadelphia Trumpet Magazine

The acting director of the Secret Service Ronald Rowe says he is ashamed that his agency allowed a 20-year-old gunman to climb on top of a warehouse roof and fire eight shots at Republican front-runner Donald Trump. "I went to the roof of the AGR building where the assailant fired shots, and I laid in a prone position to evaluate his line of sight," he told Congress on July 30. "What I saw made me ashamed as a career law enforcement officer and a 25-year veteran with the Secret Service. I cannot defend why that roof was not better secured."

Despite his shame, Rowe and his agents are doing everything in their power to stonewall Congress and make sure the American people never find out the truth about the attempt on Donald Trump's life.

Newly released testimonials from before and after the Trump assassination attempt highlight catastrophic lapses by the Secret Service and local law enforcement. Acting Director Rowe has admitted that not placing a Secret Service agent on the roof of the American Glass Research warehouse was a huge mistake. Yet an even bigger

The Miracle that Changed America's Destiny (continued)

“mistake” was not putting local police in direct radio contact with Secret Service agents. Rowe told Congress that his agents were not notified about the shooter until after the attempt on President Trump's life, even though local law enforcement were aware of the danger at least 90 minutes before President Trump even began speaking.

The alleged miscommunication was apparently the result of a siloed communications system in which local officers reported to local command, who relayed messages to the Secret Service. This might have been partially responsible for why Thomas Crooks had so much time to get into position on the roof and start shooting, even after a local police sniper called into his command to report Crooks as a potential security threat. Who decided to silo communications this way? Acting Director Rowe is not answering questions like that. Secret Service Director Kimberly Cheatle resigned over these same security failures that Rowe says he is ashamed of, but neither one will divulge who is responsible for allowing a suspicious figure to not only remain in the vicinity but spend almost half an hour on a roof overlooking President Trump only 500 feet away.

Some might say that Cheatle and Rowe are being noble by protecting the reputation of the agents who messed up at the Butler Farm rally. But a closer examination of the facts suggests a more sinister motive. Nothing that happened at Butler Farm makes sense unless someone on the inside wanted Trump dead.

The Secret Service is doing its best to make sure people never find out who that person is. Instead, it is working with the FBI to convince Americans that Thomas Crooks was somehow a lone-wolf shooter with anti-immigrant views who tried to kill Trump because he was not conservative enough.

FBI Deputy Director Paul Abbate told Congress that Crooks made anti-Semitic and anti-immigrant statements on social media. This was a lie. The CEO of Gab, Andrew Torba, has access to the same Gab social media account that Abbate referred to in his testimony. Under the handle @epicMicrowave, its user expressed pro-lockdown, pro-immigration, pro-Biden sentiments. In a post to X on July 30, Torba clarified that “the account for which data was requested was, unequivocally, pro-Biden and in particular pro-Biden's immigration policy. To the best of Gab's knowledge, as of 2021, Crooks was a pro-lockdown, pro-immigration, left-wing Joe Biden supporter.”

So why is the FBI trying to make “a pro-lockdown, pro-immigration, left-wing Joe Biden supporter” look like someone so racist and so “conservative” that he felt President Trump was insufficiently “extreme”? Could it be that Crooks actually had help from a fellow “pro-lockdown, pro-immigration, left-wing Joe Biden supporter” within the Secret Service? Could it be that the Secret Service and FBI are trying to cover up a scandal by making it an open-and-shut case that Crooks was just weird and, by the way, conservative.

That is a disturbing notion, but it is not far-fetched, because anyone

who reads the post on the @epicMicrowave account can see that the FBI is deliberately lying about Crooks's motives for some reason.

A RealClearPolitics exposé by Susan Crabtree reveals that Acting Director Rowe was directly involved in denying additional security resources and personnel to President Trump's rallies and events. Inside sources told Crabtree that it was Rowe's decision alone to deny counter sniper teams to any Trump event outside of driving distance from Washington, D.C. The reason that the American Glass Research buildings, including the one Crooks used, were apparently assigned to local police in the first place is that Rowe declined to provide sufficient Secret Service personnel.

So we know that the Secret Service denied resources and personnel, and we know the FBI is boldly lying about Crooks's political motivations.

Now a Secret Service countersniper has mass e-mailed much of the agency warning that a second assassination attempt against Trump is almost inevitable before the 2024 election because “[w]e've exposed our inability to protect our leaders due to our leadership.” This agent, many others and many Americans don't believe Secret Service leadership will successfully prevent—or perhaps even try to prevent—the next attempt to kill Donald Trump.

Sen. Josh Hawley directly asked Rowe whether any of the agents responsible for monumental security failures at Butler Farm had been relieved of duty, and Rowe confirmed that the answer is no. He instead blamed the security failures on the local police, while knowing full well that he himself had starved Trump's security detail of resources and manpower.

It's apparent the FBI is hiding something and that Rowe and the still -anonymous and still-employed Secret Service site manager are the two people most to blame for the security arrangements and miscommunications. The local police did their job by spotting Crooks and calling it in to command. But the siloed communication system the Secret Service set up delayed instructions by half an hour, giving Crooks time to get set up and shoot.

From the program Full Spectrum Survival and The Stephen Gardner Show

The Miracle that Changed America's Destiny (continued)

On August 17, both the Full Spectrum Survival and the Stephen Gardner Show reported that the FBI secretly cremated the body of Thomas Crooks.

Both shows reported that on July 27, ten days after the shooting, the FBI cremated Crooks's body destroying all evidence of the bullet wounds and how he was killed. The information of the cremation was not released until Aug 5. A second autopsy was scheduled to be made soon thereafter but is now rendered impossible. Now we will never know how Crooks was killed and from where the bullet that killed him came from. Also, it was reported that within a few days after the shooting the roof where Crooks's body lay was washed clean of evidence.

Why did the FBI do this?

It seems the federal agencies no longer believe it is necessary to be subtle in their attempt to stop Donald Trump.

Will we ever know the full truth. It has been more than 60 years since the beginning of the JFK assassination investigation and we still don't know what really happened. Will it be 2084 when the world will finally know what really happened in Butler Pennsylvania?

From the Stephen Gardner Show

On August 24, Stephen Gardner reported that as Trump was just about to visit the border on Aug 23, he and his team were tipped off

by a British news company, *The Daily Mail* about a possible assassination attempt against Trump by 66-year-old Ronald Siruda who had made multiple threats of bodily harm against Trump. The police were able to track down the suspect and arrest him. It's strange that a British news company had to tip off the police about the possible attack and not the FBI or the Secret Service.

On the Dave Hodges Show

On August 23, the Secret Service Leadership announced they suspended 5 agents. But it appears the agents were following the orders of Acting Director Rowe. Hodges believes these agents were the sacrificial lambs to cover up the real plot to assassinate Trump. Hodges reported that it was discovered that Crooks had three foreign encrypted bank accounts containing around \$2 million dollars. He says that's pretty good for a guy who could not even make his high school rifle team. Crooks' name should be changed to Lee Harvey Oswald Jr. because they are both patsies.

[End of first article on assassination attempt](#)

Trump Miracle—The Still Unanswered Questions about the Trump Shooting

The following is an in-depth account of what has been discovered in the aftermath of the assassination attempt on Donald Trump's life on July 13, 2024. This report taken from a transcription of the Wolves and Finance YouTube program released on August 25 reveals the many holes in the stories of the FBI and the Secret Service about their investigation and findings of a lone shooter in the assassination attempt.

This report came out immediately after the Secret Service announced they suspended 5 agents (reported in the first article above) who were involved in the protection of Donald Trump on that fateful day.

Was this suspension of 5 agents prompted by what a Secret Service whistleblower had just announced?

The Miracle that Changed America's Destiny (continued)

A whistleblower came forward from the Secret Service counter sniper team. He claims that the agency should expect another attempt on Donald Trump's life before the election. He sent an email to the entire Uniformed Division that he will not stop speaking out until "5 high-level supervisors are either fired or removed from their current positions." So far, the head of the Secret Service, Director Cheatle, has resigned under threat of impeachment. It was just reported on Friday (August 23, 2024) that the head of the Pittsburgh Secret Service field office and several agents have been placed on administrative duties. So, they are no longer in the field. They are holding an HR investigation that is still ongoing. To the surprise of Zach Degregorio of Wolves and Finance, over one month after the shooting, no Secret Service personnel has been fired or reprimanded. Is this whistleblower right to be worried?

Zach Degregorio of Wolves and Finance

Here are the shocking facts presented by the Wolves and Finance program of the facts the mainstream media is not telling us about. This is a long article, but it is quite informative and very revealing.

Mind you, this article is not being presented to support a Republican posture over a Democrat position. But there are so many unanswered questions by government agencies that can be cleared up with simple disclosures on their part, it begs the question why don't they do that? I am afraid we know the answer to that.

In the interest of getting to the truth, I present this article for your reading consideration.

I think you will find it interesting.

D. Miyoshi

The mainstream media is not telling you everything about an attempt that was made on Donald Trump's life on July 13th. It's been a little over a month and some new shocking facts have been uncovered.

The official story from the FBI investigation is that Thomas Crooks was a lone gunman.

He arrived at the rally, evaded security, climbed onto the roof of the HGR building he shot at Trump. And he was quickly killed in return. Why was this story of the lone gunman being pushed by law enforcement and the media the same day as the shooting. This is strange. Wouldn't you want to do an investigation before determining that no one else was involved? Why would you jump to a conclusion so quickly.

If we consider the possibilities they generally fall into three main categories. 1) Lone Gunmen Thomas Crooks acted alone; 2) Inside help, Thomas Crooks had help from someone inside the government or 3) Multiple shooters, others besides Thomas Crooks fired on Donald Trump.

There have been a number of hearings before Congress. Director Cheadle testified that the information shows there to be a lone gunman.

The Miracle that Changed America's Destiny (continued)

But when Cheadle was pushed to confirm whether it was a lone gunman. She refused. She said she has to refer to the FBI's. Investigation.

Christopher Wray, the head of the FBI also testified and pushed the lone gunman theory.

When you look at the possibilities, you can see why it would be attractive for law enforcement to push the lone gunman theory because it allows them to close the case. They can say the suspect was killed. There are no loose ends. They don't have to question anyone's loyalty.

It's really horrible if one of the other two theories are true. That not only means there's a traitor in our own government, it means that someone is still on the loose. Someone who already attempted to kill Trump and they could try again. So it makes sense why law enforcement keeps trying to convince everyone of the lone gunman theory. But that doesn't make us safer. We need to determine the truth.

What I want to do in this video is highlight some facts that contradict the lone gunman theory.

1) The White Van.

The day of the attack, the media covered that there was a white van parked nearby filled with explosives. Here is the police searching the van.

Here is the white van with Arizona license plates being towed away by the police.

We've never heard about this van again.

This van raises a number of questions. It's been widely reported that the shooter, Thomas Crooks, drove a Hyundai Sonata to the rally.

There are also photos of Thomas Cook's bicycle parked near the AGR building.

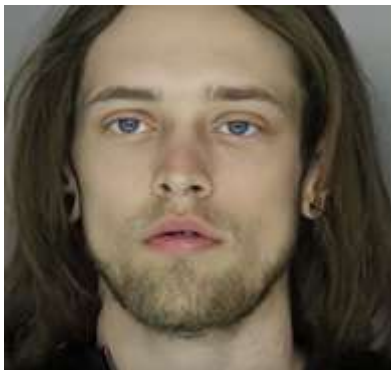

The Miracle that Changed America’s Destiny (continued)

So let me see if I understand this. Thomas Crooks decided to shoot Donald Trump, so he drove to the rally in a van, a Hyundai Sonata and then rode his bike. And am I the only person who finds this impossible to believe? It seems more likely that Thomas Crooks was not working alone and all these vehicles were possibly driven by other accomplices.

I don't know if anyone remembers this. The day of the shooting, Thomas Crooks was not the first person the media announced as the shooter. Do you remember that? It was very strange the news first announced that the shooter was someone named Maxwell Yearick.

Something like 10 news outlets announced it was Maxwell Yearick. Then, everyone in the news switched to saying no, no, no, we made a mistake. The shooter is Thomas Crooks. Why did they do that?

Let me explain to you what happened, because I think this is important. They named Maxwell Yearick because the license plates on the white van are registered to Maxwell Yearick. They got his name first. Then we found out later that the rifle was registered to Thomas Crooks’ father. And so the media all changed their story. But since the shooting, Maxwell Yearick has disappeared. No one has seen or heard from him. Where is Maxwell Yearick? His social media is wiped, his family has filed a missing person report in Arizona. I

can't confirm very much information about Maxwell Yearick, but let me just share what little information has been reported on him. The white van is tied to a company in Mesa, Arizona called Yearick Armory.

This company manufactures explosives and has a history of allegedly selling goods to guerrilla groups in Peru and Colombia with the help of the CIA. Yearick has been allegedly involved in Antifa protests in Seattle, Pittsburgh, Washington DC, Portland, Minneapolis, Chicago, New York, Los Angeles, Atlanta and Boston. Why isn't anyone in the news looking into this guy?

What is also odd is the dead body on the roof looks more like Maxwell Yearick than it does Thomas Crooks.

Just at first glance, you can see a scar on the dead body’s ear where he previously had gauges in his ear that were sewn up.

The Miracle that Changed America's Destiny (continued)

Maxwell Yearick had gauges in his ear,

whereas Thomas Crooks did not. I would like to know why the FBI has given no explanation as to why the dead body had scars for gauges in his ear, while Thomas Crooks had no gauges in his ear. Why haven't they explained this?

There are also images that look like the dead body has a tattoo on his arm.

Maxwell Yearick had a tattoo on his arm, whereas Thomas Crooks did not have a tattoo.

Some people will say well that's just dirt on his arm. I'm sorry, but you don't get dirt on the inside of your elbow. Where did the dirt come from? Was he down on the ground, rolling in the dirt before he got up on the roof and shot at Trump? That doesn't make any sense. Now let me be clear. Law enforcement has officially identified the dead body as Thomas Crooks. But if that's the case, how do you explain the white van from Arizona full of explosives. How did a van from Arizona get to Pennsylvania? Why isn't anyone asking any questions? It certainly makes me question the lone gunman theory.

2) The Cremated Body

There is a shocking development happened this last week when it was discovered that the body of Matthew Crooks is gone. Representative Clay Higgins has been doing his own investigation into the shooting.

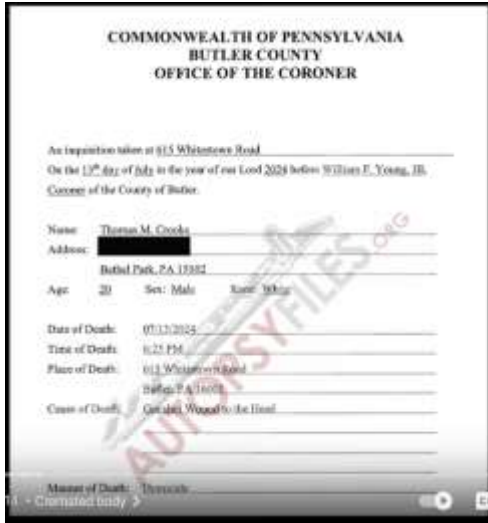

When he went to go inspect the corpse, he was told "what do you mean, you want to see the corpse? The corpse is gone. The FBI sent the body to be cremated only 10 days after the shooting. The FBI are the only people who were able to examine the body. Since the body is now cremated, there is no way to verify if the body was in fact Thomas Crooks or Maxwell Yearick, other than take the FBI's word for it. This looks like the FBI released the body for cremation as a way to destroy evidence and cover up any following investigation. The FBI has responded and said that is not the case. They claim they followed every procedure by the book. That's a little ridiculous. Why didn't they tell anyone before destroying the body? Nobody else knew the body had been released for cremation, including the county coroner or the sheriff. Why would the FBI do this in secret when they knew that Congress was holding their own investigation?

The Miracle that Changed America’s Destiny (continued)

What is also odd is that the autopsy report has yet to be released. This is all that has been released.

3) Redacted sign in sheets.

Senator Grassley was performing his own investigation

and uncovered these sign in sheets for the gun range where Thomas Crooks was practicing in the months before the shooting.

It is one page that shows Thomas Crooks died to a gunshot wound to the head. Where's the rest of the report? What procedure was done to identify Thomas Crooks? Did they check his dental records? Did they have an explanation for the scars on the ears? This is all very strange. Why is it that all the evidence that could have supported the FBI story has been destroyed? Now we just have to take the FBI's word for it.

Even more strange, the FBI released the crime scene only three days after the incident. They washed all the DNA evidence off of the roof so no one else could inspect it.

This is a gun range that was used for training by DHS and the FBI. All the names are redacted except for Thomas Crooks.

9-28	9:32	[REDACTED]			0	X				
9-28	10:26	[REDACTED]			0	X				

However, there are four instances where another person signed in at the exact same date and time as Thomas Crooks.

Did the DNA belong to Thomas Crooks or Maxwell Yearick? I guess we'll never know. Another example where we will just have to take the FBI's word for it.

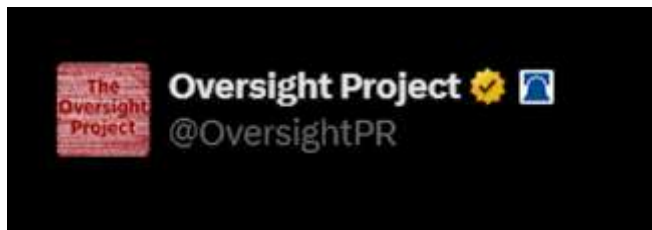

The Miracle that Changed America's Destiny (continued)

9/28	11:40		
9/28			

The name is redacted, so we don't know who this is. Who is this mysterious person who has repeatedly shooting with Thomas Crooks? Don't you think that would be important information? Why can't we see the name?

4) Cell Phone Data

Using cell phone data, the oversight project tracked multiple cell phone devices that were present at Thomas Crooks home address.

The data shows that someone who regularly visited Thomas Cook's home in Pennsylvania also visited Washington, DC near an FBI office.

Who is this person? And why would they go back and forth between Thomas Cook's house and the FBI offices? Is this the same person who was signing in with Thomas Crooks at the gun range where the FBI practices? I'm beginning to think maybe he wasn't a lone gunman.

5) Location of the Gun

One of the first things that raised questions for me was the location of the gun. Here's a photo of the dead body on the roof.

Does anyone notice anything strange? The gun is located what looks to be 10 feet away from the body. How did that happen? If the shooter was holding the gun when he was shot, wouldn't the gun be underneath him? How did the gun get all the way over there? Did he throw the gun? Did someone move the gun after he was shot? Was someone else there actually doing the shooting? If the shooter tried to crawl away from the gun after being shot, why is there no blood by the gun. No one has been able to provide any explanation as to why the gun is so far away from the body.

The Miracle that Changed America’s Destiny (continued)

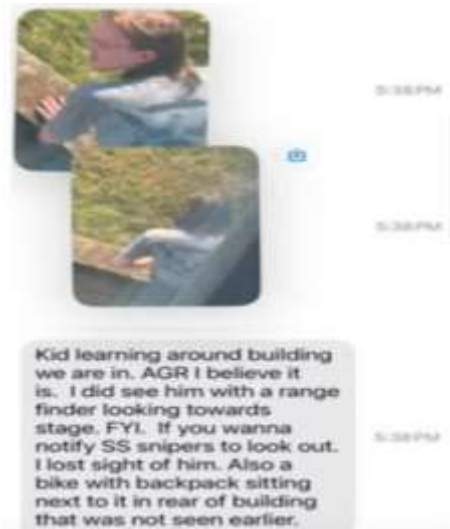

6) Secret Service text messages

A shocking text message between Secret Service agents was released. This is from one agent who was leaving from an earlier shift who saw Thomas Crooks in the parking lot.

He says “someone followed our lead and snuck in and parked by our cars. Just so you know, I'm just letting you know because you see me go out with my rifle and put it in my car. So he knows you guys are up there. He's sitting to the direct right on a picnic table about 50 yards from the exit.” The agent responds with a thumbs up emoji and Roger that. This text was sent at 4:26 PM showing that the Secret Service knew there was a threat from Thomas Crooks over 90 minutes before the shooting. That's even earlier than we previously thought. It also shows the Secret Service themselves were aware and acknowledged the threat. They can't say that the information didn't get to them. So why did they let Donald Trump get on stage with a threat in the crowd? If they had 90 minutes to neutralize the threat, what took them so long? This is supposed to be the best security force in the world. What are they doing?

But the text messages get even worse. Here are photos taken of Thomas Crooks at 5:38 PM by one of the Secret Service counter snipers.

He said “kid lurking around building. We are in a GR. I believe I did see him with a range finder looking towards the stage. FYI, if you want to notify Secret Service snipers to look out. I lost sight of him, also a bike with backpack sitting next to it in rear of building that was not seen earlier.”

I don't even know where to begin. The sniper saw him, took pictures of him, saw him looking at the stage with the range finder and they still didn't stop this guy.

But it's even worse. The location of this photo was taken from is inside the same building that Thomas Crooks fired from. Yes, the Secret Service snipers were inside the building while Thomas Crooks was on the roof. Let me explain the layout of the site. Here is the roof where Thomas Crooks. was laying down.

Here's the stage where Donald Trump was speaking.

The Miracle that Changed America’s Destiny (continued)

There were Secret Service snipers on both of these roofs.

So going back to the photo the sniper took on his phone. Thomas Crooks is sitting on a wall. That wall is right here.

It is still incredible to me that no snipers were stationed on this roof.

The sniper is looking down from this window.

Director Cheadle claimed the reason was because the slope was too steep. Instead, the snipers were stationed on the 2nd floor inside the building. Right here, they were right there.

Now the snipers claim that from this window they could not see where Thomas Crooks was laying down on the roof. But why not look out this window or this window.

The Miracle that Changed America’s Destiny (continued)

I don't believe that the Secret Service didn't walk around the floor and lookout the other windows. In fact, we have video from the other windows. They could have literally opened the windows and climbed onto the roof. Thomas Crooks was in plain sight of those other windows.

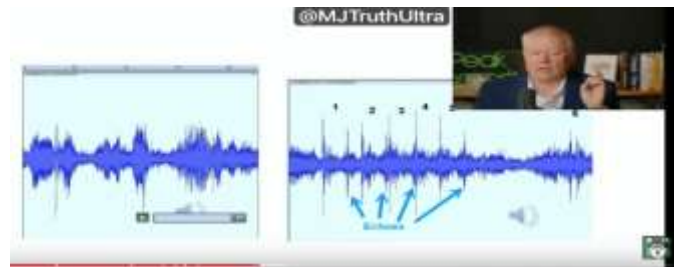

What is even crazier is what happens next. The same sniper who took those photos from the window conveniently decides to leave his post right before the shooting started. At 6:06, he decides to move to the ground floor to find a local police officer to alert them about Thomas Crooks. At 6:11, the shooting started. This is a sniper whose sole job is to protect Donald Trump during his speech. You're telling me that he decided to leave Trump unguarded during the speech to go report a threat? What about using a radio? Something does not add up.

7) Audio of gunshots

I covered this in my last video. You can listen to the audio from the rally and tell a lot about the gunshots. You hear the same thing in all

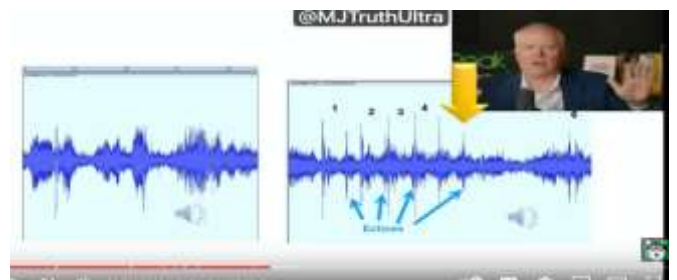

the different camera angles that were shot at the event.

Sound analyst talking: “We just have an absolutely different sound between the 1st and 3rd shot. There's no echo, it's much further away. It's more muffled. It's just not in the same place at all. But these next ones, very different sound. Totally different weapons. OK. Full stop. We have two separate weapons. Plus, we have no echoes coming off of the 1st 3 shots and then we do have echoes coming off of the next set.”

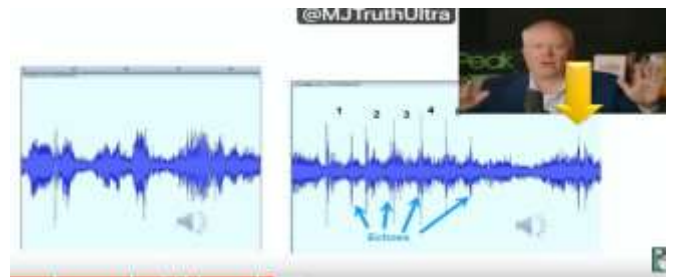

So there are three shots to start, and then five more. And they sound like they are clearly coming from different weapons and different locations. Let me repeat. You can hear this difference in all the different videos of the shooting. Audio does not lie. I don't see any way that these gunshots sound like they are coming from a lone gunman.

So there are eight shots, then one more here that stops the shooting.

And then the final one here,

The Miracle that Changed America's Destiny (continued)

which was the death blow from the Secret Service sniper. What's interesting is the shot before the last was from a local SWAT police officer. While the other Secret Service agents were covering behind Trump this police officer ran into the line of fire as soon as the shooting started. He drew his weapon and fired, damaging the rifle, which stopped the shooter from continuing. It was only after this that the Secret Service fired and killed the shooter. This begs the question, why didn't the Secret Service fire first? What were they waiting for?

8) The Water Tower

There has been a lot of discussion that there was a second shooter from the water tower. This is zoomed in from the live stream at the rally. This appears to be a man standing on top of the water tower while the shooting is in process.

Personally, I think this is very convincing, but some people argue that this was just a visual glitch or a shadow. I think it's important to realize that this video is not where the water tower theory started. It started because people at the event were claiming the shots were coming from the water tower. Keep in mind that some of the people at the event were veterans and have experienced being under fire and determining where bullets are coming from.

Attendee "This crack of the gunfire and I just screamed. It's the sniper. It's the sniper and he was firing down toward the water tower"

There are three eyewitness accounts all saying that there was a sniper on the water tower. Now it is possible they were confused, but I think that someone should climb up there and check it out. But for some reason the FBI will not let anyone up there.

Congressman Clay Higgins has been performing his own investigation.

He went out to the location and then wrote a report supporting the lone gunman theory. He wants people to stop talking about the water tower. He says "if there had been someone on that tower on July 13 it would have to have been some top shelf operator way beyond anything I've ever actually seen. Regular SWAT operators or snipers would not have the skills and gear to quickly overcome the first 25 feet of no ladder and then climb the remaining 75 feet to the catwalk and then climb the quite intimidating and precarious dome vent access ladder."

Really, Congressman, you don't think that any of our special agents could handle climbing a water tower? I find that hard to believe. Why is this congressman trying so hard to convince people to stop talking about the water tower?

An interesting fact you should know is that on the day of the shooting the water tower was guarded by two local cops. Now get ready for this. These two cops just happen to leave their post one hour before the shooting. Isn't that convenient? Why are all these people leaving their post at the exact right moment? The sniper in the HR building left his post just before the shooting. Now these police officers left their post right before the shooting. I want an explanation of why these cops left their post.

Now the congressman wrote his report without actually climbing the water tower himself. It was blocked off and no one would let him climb up there. Why is everyone being kept away from this water tower? Isn't that strange?

What is disturbing to me is that you can see in this video that the water tower is being blocked off.

The Miracle that Changed America's Destiny (continued)

Why are they treating it like a crime scene? Here's a photo of the site layout. The shooters body was found here.

It would explain the different audio if some of the shots came from the water tower and others from the roof.

Here's another video taken from before the rally started. The driver was driving past the site and captured this photo. If we freeze the video we can see a truck beneath the water tower.

Donald Trump is on stage here,

so the water tower is coming from a similar angle and can hit all the same shots.

This doesn't look like a police vehicle to me. It looks more like a government vehicle.

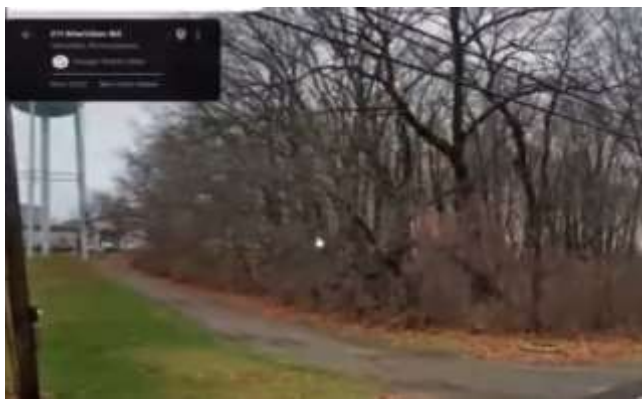

Who was at the water tower? There's someone on YouTube named Black Gen. Z. Mindset and he went on Google Earth and found that nearby the water tower there's an entrance to the sewer system. This YouTuber might have just figured the whole thing out. There is a sewer manhole near the base of the water tower.

The Miracle that Changed America’s Destiny (continued)

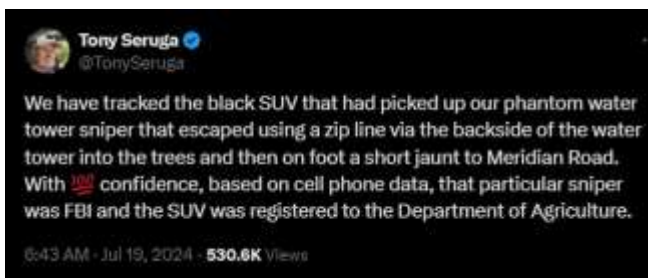

He could have come out of the manhole, climbed the water tower, shot at Trump, then climbed down and escaped through the man hole cover (bottom right hand corner of photo below) through the sewers.

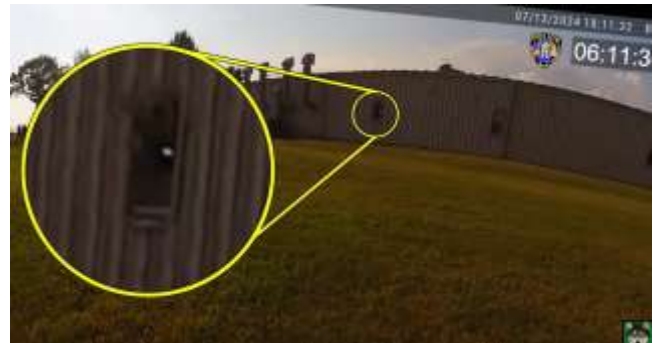

But escape through the sewers is not the only option.

Here's a tweet by Tony Seruga saying we have tracked the black SUV that had picked up our Phantom water tower sniper that escaped using a zip line via the backside of the water tower into the trees and then on foot. A short jaunt to Meridian Rd. with 100 confidence based on cell phone data. That particular sniper was FBI, and the SUV was registered to the Department of Agriculture.

Now, Tony Seruga has not provided the data to back up these claims. So I cannot verify if they are true. We don't know if the shooter went through the sewers. We don't know if the SUV picked him up. All I'm saying is that there's enough eyewitnesses that saw something happen at the water tower that someone should go investigate. But instead, they're not letting anyone up there.

The water tower is not the only possible location. If we look at video of the AGR building at the exact moment of the shooting. We can see what looks to be like a muzzle flash coming from one of the first floor windows.

People have criticized this as potentially just a reflection from the glass in the window. Another potential location is the Butler Gymnastics Club, which is another nearby building. That was also not being watched by Secret Service. It could also match the trajectory of the bullets. Here's where Trump was.

The Miracle that Changed America’s Destiny (continued)

Here's the water tower.

Here's the AGR building

and here is the gymnastics club.

Whatever the location was, you have to start asking the question why were there so many possible locations where people could shoot at Donald Trump?

9) The 8 Shell Casings

The reason the FBI gives that this was a lone gunman is they claim to have found all 8 shell casings they allege were fired by Thomas Cook's rifle. They claim this means that all shots are accounted for and they all came from Thomas Crooks. There could not be a second shooter because the FBI has the shells. But here's the problem. The FBI has not let anyone else inspect the shells. That's strange. For all we know, the FBI could have placed those shells at the crime scene. Here's my problem with the FBI story. If the FBI is telling the truth, the police body cam footage should confirm their story. We should be able to see the shells on the roof. Now, I've spent a lot of time going through the body cam footage and it's not as straightforward as you would think. I'm going to show you something that I don't think anyone else has noticed.

Here is the body cam of the police counting out the shell casings on the roof. The officer counts 5 shell casings.

He points out five shell casings, but there were eight shots. Where are the other 3 shell casings?

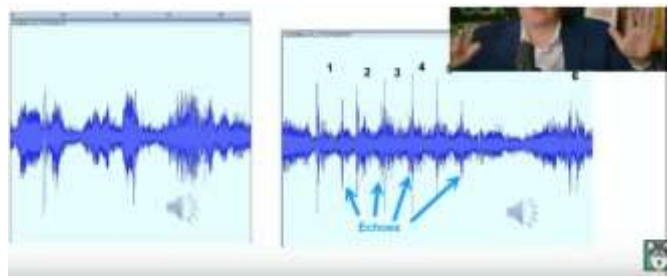

There's nothing else on the roof, so we should be able to see them quite easily. About 20 minutes later in the body cam footage, this same officer counts a second time. He now counts out 8 shell casings.

The Miracle that Changed America's Destiny (continued)

Why did he count five the first time and eight the second time? His body motion tells us that three of the shells were much farther away from the body. That's strange. Every time a gun fires, the shell ejects and lands on the ground next to the shooter. It's very predictable to tell where the shells will land based on the location of the shooter. Now maybe the cop just didn't see the shells the first time he counted. But I found it very odd that he specifically counts 5 shells and then after a break in the video he later counts another three. This matches the volleys of shots. There were three shots, in the first volley and then a second volley of five shots. That's a pretty strange coincidence. Now, I'm not saying this cop screwed up. I think he had two different counts of the shells because three of those shells weren't where they were supposed to be. So then the FBI comes in later and says we have 8 shells, so there's only one shooter. We're going to need a better explanation than that. There were a lot of people on that roof. How do we know that someone didn't place those extra 3 shells after the fact? And why aren't those 3 shells in the location they're supposed to be? I would like to see the FBI do a test. Someone should replicate the shots with the rifle and see where the shell casings fall. Because I'm betting that they fall in a different location.

Let me provide another explanation. The first volley of three shots that fired on Trump could have come from a separate location like the water tower. The 2nd volley of five shots could then have come from the roof of the HGR building. Someone could have placed three extra shells on the roof after the fact. That would match what we see with the five shells from the first count in the body cam footage, followed by three more shells in the second count. All of this also matches what we heard in the audio.

I think we need to ask the FBI why won't they let anyone inspect any of those shells? Like everything else, we're just supposed to take their word for it.

10) The detonator.

Another major question that has never been answered is about the detonator.

Thomas Cooks had in his possession an electronic transmitter. There are two explosive devices in his car. Director Wray testifies they recovered 3 explosive devices, two in his vehicle and one in his residence. I believe the FBI here is referring to the Hyundai Sonata as the vehicle. The FBI has said that they found no Internet searches by Thomas Crooks on how to make an electronic transmitter. This is a huge question. How would Thomas Crooks know how to make explosives unless he was working with someone else. For an electronic transmitter to work he would need a blasting cap. You can't just go out and purchase a blasting cap. They're regulated by the ATF. So that means he would need to make one. He would need a massive, smelly chemistry lab at his home to manufacture a blasting cap. It doesn't sound like he had that. So where did he get a blasting cap and transmitter? For that matter, how did he know how to make

The Miracle that Changed America's Destiny (continued)

these explosive devices without doing any Internet searches? This is more evidence that he was not working alone. Someone showed him how to make those explosives. How come no one in the news is trying to figure out who that was?

11) The phone call from the father

On the day of the shooting, Thomas Cook's father called the police.

This has always been a problematic part of the story. Here's the official story, as reported by the BBC. Thomas Crooks' father called police because he was worried about his son and his whereabouts. It's unclear when the call was made, but it was before the shooting. So the timeline goes something like this. In the morning, Thomas Crooks asked his father if he could borrow his AR15 style rifle and went to the shooting range. The father thought his son would return home around 1:00 PM. When the son did not come home, the father called the police. Now if this phone call occurred sometime before the shooting, it would have been between 1:00 PM and 6:00 PM. That's a 5 hour window. Now let me ask a question to any parents out there. If your son was late coming home on a Saturday afternoon, would you call the police within the first five hours? I can't imagine why anyone would do that unless something else was going on. Did the parents have reason to believe he was going to cause violence at the rally? What did they say on that phone call? I am also interested if the parents know who the second person was who traveled from their house to the FBI office in Washington DC.

Now if the parents called the police, that phone call would have been recorded. But what is very strange is that when people have done information requests with the police department, the police claim that the recording of the phone call does not exist. It sounds like the phone call is being covered up. Why? What did they say on that phone call? What is also disturbing is that this is not the only record-

ing that doesn't exist.

In his testimony to congress Director Ronald Rowe's said the Secret service has no recordings of the conversations on the day of the shooting. He said it is unfortunate that they did not make recordings but they will now begin to make recordings.

The Secret Service has no recordings of their communications. Why does everything seem like a cover up?

Let me give my own explanation of the phone call from the father. Now I can't confirm any of this, but it's the only explanation that I think makes sense. Thomas Crooks probably bragged at home that he was going to go to the rally to shoot Donald Trump. The father probably only agreed to let him go to the gun range if he would come back home by 1:00 PM before the rally started. When his son did not come home, the father became worried and called the police. That means the phone call to the police was a tip that someone was on their way to the rally to shoot Donald Trump. If the police had this tip, why would the Secret Service allow Trump to go on that stage? Unless there's a traitor within the Secret Service.

12) The Men in the Grey Suits

There has been confusing video showing men in grey suits involved in the investigation immediately following the shooting. Here is one man in a grey suit at a Jeep.

Here's another man in a grey suit talking to law enforcement.

The Miracle that Changed America's Destiny (continued)

Who were these random people in grey suits?

News anchor talking: "The local officers went up to that roof and started taking pictures of the dead body of the shooters body. So suddenly a guy in a grey suit walks up the ladder and goes up to the roof. And this guy in the grey suit, who didn't appear to have credentials, everybody assumed he was the Secret Service. So he tells one of the local law enforcement send those pictures to this cell phone and he gives them a number to send. Everybody assumed that must be Secret Service. It turns out it wasn't Secret Service."

This is weird, so apparently the man in the grey suit asked the police to text photos of the body to someone at ATF, The Bureau of Alcohol, Tobacco, Firearms and Explosives. What does ATF have to do with anything? Who were these men in grey suits and why were they randomly at this particular Trump rally? And why did no one in law enforcement question the men in grey suits giving orders at a crime scene? They're ridiculous orders and it seems more likely it was just an excuse to get on the roof. Here's the real question. Was the man in the grey suit standing anywhere near where the mysterious 3 shell casings were found? This is very strange and so far the FBI has not given anyone an explanation for this. Who were the men in the grey suits?

13) People acted like they knew before what was going to happen

One of the most concerning things is that it seems like people knew that something was going to happen before the shooting even took place. In an interview one week before the shooting, Director Cheadle talked about the Secret Service being ready to counter both lone shooter incidents and organized attack incidents. You have to admit that's strange timing.

Then there was this interaction with Senator Joe Manchin talking about Joe Biden the week of the shooting.

Manchin was asked if he were confident about Joe Biden being up to running in the election. Essentially Manchin says he was confident about Biden and that if you just wait this weekend there will be more coming out.

What is that mean? He says if you just wait until this weekend, there'll be more coming out. What did he know about what was going to happen? That's kind of a strange thing to say.

Then there is this interview with Victoria Newland.

The Miracle that Changed America’s Destiny (continued)

In case you don't know who she is, she was the former national security adviser to Vice President Dick Cheney. She worked in government during the Clinton, Bush, Obama and Biden administrations. She left government during the Trump administration. She's married to Robert Kagan who is one of the main instigators for George W Bush and his war in Iraq.

Victoria Nuland was one of the primary instigators for the current war in Ukraine. This is someone who has been deeply involved in CIA operations around the world for the past four presidents, except for Donald Trump. If something happened to Trump, it would mean the continuation of this NEO-CON foreign policy of US wars around the world.

An interview with Victoria Newland happened two days before the Trump shooting.

In it she says “I don't think that Donald Trump is going to be presi-

dent. So if that's what Putin's betting on, he's going to get an unhappy surprise, I think.”

This is a woman with close relationships with high level CIA officials. Why does she have this strange smile when she says I don't think Donald Trump is going to be president. What did she know?

Then there were other odd things like the Investment Fund shorting 12 million shares of Trump stock right before the shooting.

File Date	Source	Investor	Amount
2024-07-12	13F	Austin Private Wealth, LLC	24,000,000

Funds Shorting Rumble Inc.

Then there's the fact that CNN live streamed the rally.

I don't believe CNN has ever live streamed a Trump rally. Why would they decide to start for this particular rally? There has been comments that the justification was that CNN was thinking Trump might announce his VP pick at the rally. But that seems like a strange reason to me.

The Miracle that Changed America's Destiny (continued)

Then there was a photographer that captured what is described as a one in a million shot of a photo of a bullet whizzing past Trump's head during the attack.

This photographer would have had to set specific high speed camera settings to capture a bullet in motion. That's pretty strange. You would normally use high speed settings to capture something like a sporting event like a basketball game.

Why would you set high speed camera settings to capture someone giving a speech?

What did he think was going to happen? What's even more strange is this photographer is someone named Doug Mills.

He is a two time Pulitzer Prize winner. Why did this world famous photographer decide to cover this small town rally in Pennsylvania?

He was also the same photographer who snapped another historic photo. He was on hand when George W Bush received news about that tragic day in September.

Why is this one photographer always on hand for these historic moments with just the right camera settings?

Why do all these people seem to know in advance that something was going to happen? It seems to me less likely that this was a lone gunman. And it seems more likely to me that something like 40 people were involved in a mass conspiracy to take out Trump.

Let's just do a recap. These are some facts that make me question what the FBI is telling us.

RFK Jr Endorses Trump with Twist

The white van, cremated body, redacted sign in sheets, cell phone data, location of the gun, Secret Service text messages, audio of gunshots, the water tower, the detonator, the phone call from the father, the men in the grey suits and the fact that people acted like they knew before.

I think there are enough indisputable facts to show that the FBI is lying to us about their investigation. That means that Trump is still in danger. So when the whistleblower from the Secret Service is saying that 5 senior Secret Service officials need to be fired, I say tell me the names and let's fire them. To be honest, I don't think 5 names is enough. Why has not one single person been fired from that day? What's so frustrating to me is that no one in the mainstream media is looking into this. I'm betting that most of you have never heard of any of this stuff. It seems like Wolves and Finance is doing a better investigation than the FBI.

Here is my message to you. I know it can feel depressing. You're watching your country fall apart. You're scared for your family and the one politician who is standing up for you gets shot. The media won't look into it. The police aren't doing anything. The FBI is covering it up, and if you ask any questions, you are told that you're crazy. I'm here to tell you that you are not crazy. These are facts that we can see with our own eyes from the videos. It's OK to question the narrative. It's OK to believe in justice. It's OK to demand the truth. It's OK to stand up and say that Donald Trump needs protection because he stood up for us.

It's up to us to keep asking questions and do not stop until we get the truth. Tell people about this video. Share it on social media and hopefully we can get some attention for all these unanswered questions.

Thank you.

End of second article on Trump assassination attempt

RFK Jr Endorses Trump with Twist

RFK JR ENDORSES TRUMP WITH A SURPRISE TWIST!! KAMALA'S PANICKED!

On August 21, Robert F. Kennedy Jr. announced he would be dropping out of the presidential race and would endorse Trump. An iconic Democrat officially announced his support for a Republican presidential candidate.

President Trump is Going to Jail

This announcement was immediately reported by Dave Hodges. The following are Hodges' comments in abbreviated format which reveal that despite what the media says that RFK Jr's dropping out will help Kamala Harris, in actuality his dropping out will inflict a devastating blow on Harris' campaign. Here is what Hodges said:

The mainstream media (ABC, CBS, NBC, CNN, MSNBC) are now bashing RFK Jr like never before while at the same time saying it won't affect the election much. The reason the media is roiled is not because RFK Jr dropped out of the race but because of how he dropped out of the race.

RFK Jr announced that he will remove his name from the ballot in "critical swing states" but stay on the ballot in the other states allowing the voters to still vote for him. This will likely give Trump the edge in the battle ground states which will effectively assure Trump the victory.

Before RFK Jr's announcement, Donald Trump Jr. tweeted that RFK Jr would make a great director of the CIA. Hodges, who has studied the JFK assassination for over 30 years remarked that the CIA was the "first mover" in that assassination and they were also involved in the assassination of Robert F Kennedy, RFK Jr's father at the Ambassador Hotel in Los Angeles. Hodges remarked this appointment would lead to an incredible "housecleaning" of government.

RFK Jr denied media stories that he made overtures in late July to support Kamala Harris because he said he met with Trump on supporting him on July 14, two days after the assassination attempt and therefore why would he meet with Harris in late July.

RFK Jr, said the main reason he wants Trump to win is because he wants the American administration to stop the war in Ukraine and to win the war against child molestation as well as the destruction of the health of the America people by the pharmaceutical and food companies and the medical system.

Interestingly, some of the swing states including Michigan and Wisconsin have refused to allow RFK Jr. to take his name off of the ballot stating it is against the rules. Yet they allowed Cornell West, former Democrat but now registered independent, to take his name off of the ballot.

In November we will know if RFK Jr's plan will have a chance to come to fruition.

D. Miyoshi

President Trump is Going to Jail

On August 15, 2014, conservative talk show host Dave Hodges said on his *Common Sense Show* that his confidential sources have informed him that Donald Trump will be sentenced by Judge Juan Merchan to jail in September.

On August 19, 2024, jury selection begins in the New York trial before judge Merchan on charges that Trump falsified business records over the reimbursement of hush money payments made before the 2016 election. Judge Merchan is a controversial figure, having been recently involved in several cases against Trump confidants. Obviously, a Trump jail sentence will have a dramatic effect on the election.

Here is the transcript of Hodges' announcement on his show. It's eye opening.

D. Miyoshi

RED ALERT! TRUMP TO BE SENTENCED TO 1 YEAR IN PRISON! WHAT WILL YOU DO?

By Dave Hodges Common Sense Show

Aug 15, 2024

How Kamala will become the President

President Trump is going to jail! There are multiple sources crossing my feeds saying this, and here's what's interesting. A week ago, the betting sources said Trump, Trump, Trump, leading by 58%. But four days ago on Aug 10 things changed when Judge Merchan announced that he was moving the trial forward, with no delays and he refused to recuse himself, at the request of the Trump attorneys, for the third time. Here's what's interesting. Judge Merchan has a daughter who's made millions on this trial and she's working for Kamala Harris. No conflict of interest there is there?

And the unfortunate thing is this. The Supreme Court sits there on their collective thumbs twerking and jerking. You are a disgusting body. I don't know why the Democrats want to reform you because you suck already, like a bunch of Democrats minus 3 of you. I am tired of it. They should be stepping in right now and straightening this crap out right now. They should not allow this blatant interference.

September 18th, Trump goes before Judge Merchan. And this is how we know he's going to jail. At Rikers Island they are already clearing a section of the prison for President Trump. And it's so bad, the conditions are so bad, the feds have threatened to take over the prison. And folks, I said this before. Trump will never be allowed to become president. They've already tried to kill him. Now they're going to imprison him. And if somehow, he still manages to get around this, they are going to kill him.

Let me ask you a question. On September 18th, which is a month and three days from now, what will you do when they sentence the man who would be president to prison? And the recommended time I'm hearing is a year. But I'm hearing behind the scenes Judge Merchan is really considering extending this sentence. Tell me what you're going to do?

Some people are going, well that's civil war! Well, what happened when they tried to kill him? Were there any riots? Were there any protests? Nothing. Because the left has succeeded in intimidating the men in this country to being a bunch of spineless sissies. They can abduct your spouse, and I doubt that very many people would do anything about it. And the ones that would, come to channels like this. There is not enough. Trump's going to prison.

And here's the interesting thing. After Trump was shot, in the middle of the investigation it got really hot and it was shown that it was an inside job. What did RINO speaker Mike Johnson do? He called a three-week vacation. Let's take the heat off the Democrats. Let's take the heat off the assassination plot. I ask you again. What are you going to do?

I don't think anything's going to happen. But I do think Trump is going to prison. Oh, by the way, Las Vegas was betting on Trump until Judge Merchan refused to recuse himself. And now Kamala Harris has taken a commanding 10 point lead in the betting. And who's going to be the next president? Be afraid, America. Be very afraid.

How Kamala will become the President

Aug 21, 2024

This is a transcript from the Mr. Reagan program (not Ronald Reagan) on why Kamala Harris will become the next president. Mr. Reagan is a staunch conservative commentator and supporter of Donald Trump for president. However, he is at heart a realist and in this video (transcribed here) he explains why he believes Trump will be defeated in the coming election. This is despite and in the face of the presidential polls showing Trump running considerably ahead of Harris.

How Kamala will become the President

Democratic commentator Brian Stelter once quipped “emotion trumps policy in an election”. This is where skillful and timely propaganda comes into play. If it is done right, propaganda can “trump” Trump’s campaign and his efforts to win the election. In this program Mr. Reagan explains how and why emotion will play a big role in Kamala Harris winning the election. And here is a spoiler Alert, Mr. Reagan believes there will be an event in October that will lead to making Kamala president.

I don’t agree with Mr. Reagan’s prediction that Kamala Harris will become the president, but I agree that his analysis is well reasoned and compelling. Essentially he is talking about the creation of a second honeymoon period for Kamala that will carry her through the election. I present it here for your reading consideration. Let’s see if he is right.

D. Miyoshi

Mr. Reagan:

I'm going to say something that you probably don't want to hear and that you certainly won't like hearing. But I think it's true. So I'm going to say it. Kamala Harris is running a great campaign or should I say the brains behind Kamala Harris is running a great campaign.

Certainly, Kamala was always poised to get a huge bump at first because people were naturally going to be relieved that Joe Biden finally bowed out. So no matter who jumped in there, there was always going to be, you know, sort of a flash of enthusiasm from leftist voters. But this enthusiasm is temporary, and so this is not why I predict that Kamala Harris will be the next president. I don't think that they can sustain this energy if they stick with their current strategy. And so, I think they will have to change things up. Therefore, I'm predicting an October surprise and this October surprise, this political gimmick will be the reason that Kamala Harris becomes the next president of the United States of America.

So, I think Kamala Harris's handlers are doing a great job. Consider the fact that they have the worst candidate for President, probably in the history of the country and they are up

against one of the most successful presidents in history and a man who just recently survived an assassination attempt and became an American legend. And look, the years of lies about Donald Trump have certainly made some people hate him. But that's not really enough for Kamala to win. Her team needs to get people excited to vote for her. And they need to maintain that excitement through to the election.

And of course, the mainstream media has done everything in their power to try to convince America that Kamala Harris is magnificent. But the primary strategy that Kamala’s handlers seemed to have taken since that initial boost provided by that relief about Joe Biden, what they've done is a kind of Hail Mary strategy. And the thing is, this strategy seems to have worked a lot better than I think, even the political strategists could have ever possibly imagined. And honestly, I think that's a little bit of a testament to how gullible Democrat voters are. This Hail Mary strategy has been, you know bread and circuses, put on a great show, offer zero substance, dazzle the crowds with the illusion that Kamala is fantastic but provide nothing real or significant that can be analyzed or criticized. Think about this, all of Kamala’s campaign rallies are actually musical concerts, where at some point during the concert, Kamala gets up and she speaks. Now this massively inflates the number of people going to these events. It creates the illusion that Kamala can draw huge crowds just like Trump. Kamala has provided almost no policy prescriptions at all, and of the few that she has presented, two of them were stolen from Trump.

(Kamala took Trump’s of revoking taxes on hospitality worker tips and calls it her own despite back in 2020 she supported legislation to tax these tips.)

Kamala has even pivoted on several key political issues in order to pretend that she's a moderate. The other day, Brian Stelter actually explained what this campaign is really all about.

Brian Stelter speaking “I think Trump was jealous of the joy

How Kamala will become the President

right now, there's so much anger coming from Trump's speeches. Joy is real and it's important people can make fun of it and say focus on the policy. But if you ask political scientists and psychology professors, they'll tell you the emotions matter in politics. Sometimes they matter a lot more than the policies, and that's, I think the big story this week.”

Now what Brian Stelter is saying here, it sounds kind of silly. It sounds like nonsense, but he's actually right. And look what he's saying here is actually kind of a shocking admission. Let me explain. The reason that he's right is because he's talking about Democrat voters. Left wing politicians. Democrats. They have always relied on emotional manipulation over reason, over logic and over truth. This has been their primary strategy since I was a little kid.

On the immigration issue they always tell the story about the poor, hardworking illegal immigrant mother who just wants to feed her family.

On abortion, they always insist that without legalized abortion on demand, services at any stage of the pregnancy, then 13 year old girls all over the country are going to abort their babies themselves using rusty coat hangers in back alleys. And they're gonna give themselves a nasty infection and die.

On race, they pretend that black Americans are at such a severe disadvantage on a systemic level that they can work twice as hard as a white man. They can be twice as smart. They can be twice as skilled. They can be better than white people at everything, and they still might never succeed over their inferior white colleagues. And they also claim that racist white police officers are murdering unarmed black men all over the country in massive numbers each and every day.

And of course, they have established a horror story around climate change, where just about everything bad that happens can be traced back to climate change. And that climate change

is exclusively caused by CO2 in the atmosphere that has been produced through human activity and if we do not take drastic action, the world will end in 12 years.

On the LGBTQ XYZ issue, they always say that gay men are ruthlessly bullied and so they're terrified of coming out of the closet because they will be ostracized by society. And they also insist that transgender kids will all jump off a cliff if we don't use their preferred pronouns.

And all of these stories are ridiculous, of course, but Democrat voters really buy into this stuff. And that is the primary reason that so many Americans vote Democrat. They have been emotionally manipulated. And what is emotional manipulation when it comes to politics. Well, there is a very well known term for this. It is called propaganda. And so what Brian Stelter is saying here is that leftist propaganda is working and that's why I said that what he's expressed here is a shocking admission because the left usually hides the fact that what they're presenting to the public is propaganda. But here, Brian Stelter has, I think, inadvertently let the cat out of the bag. He has said the quiet part out loud. He said that emotion is sometimes more important than the policies and this is what the left really believes. They try to emotionally manipulate voters so that they don't think too much about the policies because their policies suck. And Kamala doesn't even have policies. But that's OK. The emotional manipulation, the lies and the big circus that they're putting on, the spectacle that they're presenting to the people, this is their tactic to try to create the illusion that Kamala is fantastic.

But this will not last forever. Like most trendy things, people will move on from this. And when they do move on from this, the Kamala campaign will need to do something to keep her popularity up. And they have a huge problem then, because traditionally what a candidate would do after the initial momentum slows is they present a vision for America. They point to the record and they point to their policy prescriptions

How Kamala will become the President

and explain why they would be the best person for the job. But Kamala can't do that. She has some fatal flaws that make this standard tactic impossible for her.

First of all, her record is terrible. She's got the most hard left radical record of anyone in political office. The Biden/Harris administration caused significant inflation and they brought in millions of illegal aliens, which appears to have been done intentionally. And I think even if you put aside all of her other enormous blunders, these two problems alone should sink her candidacy. But beyond her record, she's actually terrible at speaking off the cuff. She talks to people as if they're infants. Kamala speaking here "So Ukraine is a country in Europe. It exists next to another country called Russia. Russia is a bigger country. Russia is a powerful country. Russia decided to invade a smaller country called Ukraine. So basically that's wrong."

Kamala speaks in word salads.

"I think it's very important for us at every moment in time and certainly this one to see the moment in time in which we exist and are present to understand where we exist in the history and in the moment as it relates not only to the past, but the future."

And she laughs off serious questions made to her.

And she is incredibly phony, and this is best illustrated of course, by when she tries to sound black.

She just doesn't have the kind of natural charisma or authenticity that Trump has. And this will be exposed if she ever tries the usual campaign tactics.

And so, what can they do? Two words. October Surprise. An October surprise is an unexpected event that affects a presidential race in October, right before the election. An October

surprise can be a totally random thing. Or it can be intentional. A campaign can do something so radical that completely changes the trajectory of the race. And I think that is what the Democrats will do. And this is why I believe Kamala will be the next President.

You see, people forget that Kamala Harris is right now the vice president. She doesn't actually have to beat Trump to become the next president. She just needs Joe Biden to step down. And that I believe is exactly what's going to happen. I believe that sometime in October, probably in the second or third week, Joe Biden will step down. This will accomplish a number of things, but the primary thing it'll do is it'll put a massive spotlight on Kamala Harris. She will be a star. The mainstream media already showers her with praise, and they repeat the absurd narrative that everything about Kamala Harris is amazing and perfect. But people won't just buy that adulation forever without some substance behind it. And eventually, Trump's team will capitalize on this. And they will bring the spotlight back to Trump, and they will expose Kamala as a fraud. This will be especially true after the first debate. After the debate, Kamala will lose a lot of her momentum and the enthusiasm for her campaign will dip. So how do you shift the media attention away from Trump and back on to Kamala? You make her president.

Biden steps down and then Kamala becomes the first female president in the history of the country. She wasn't elected to that position, but that doesn't matter. She has just made history. She's the first woman president of the United States of America. You could not find a woman less worthy of this position. And yet this, I believe, is what the Democrats plan to do.

And why am I so convinced that they'll do this? Because it's too good of an idea. It would be foolish not to do it. A friend of mine called me the other day, a former Democrat who has turned into a Trump supporter. And he was worried about the

Advancing in a Time of Crisis

Financial Crisis Report

David M. Miyoshi is a California attorney at law with a Martindale-Hubbell AV Preeminent Rating for Attorneys. He earned his Bachelor of Science degree from the University of Southern California, a Juris Doctor degree from the University of California, an MBA degree from Harvard University and an International Graduate degree from Waseda University in Tokyo.

He is Managing Attorney of Miyoshi Law, an International Law Firm where he approaches legal issues through a commercial lens and is a trusted legal and business advisor to his corporate and estate clients. In military service in Vietnam, he led a Combined Action Platoon as an officer in the U.S. Marine Corps and received the Naval Commendation Medal with "Combat V".

He appears in 14 Who's Who publications throughout the world and is listed as a specialist in international business, real estate and estate planning.

new excitement over Kamala. And I explained this whole idea I have to him and his response was well, he freaked out, he said "Chris, that is brilliant. That is so brilliant, actually, that they have to do it." And he's exactly right.

And for those of us who care about this country, this is a tragedy. The next president should be a person who deserves the position. They should be someone who cares about this country and who has the qualities necessary to improve this nation. Kamala cares about Kamala. That is all. The only quality that she has is ambition. And if she's elected to the presidency, this country will crumble. But the Democrats will not wait for the election. They will be handing her the presidency in October.

And so we will be seeing a Kamala Harris presidency for at least two full months before the Inauguration in February. So, I do not believe that Trump will be 45 and 47. I believe that he will be 45 and 48. And look, I may be wrong about this. I hope and I pray that I'm wrong. I hope and I pray that Donald Trump will be 45 and 47. But I fear that I'm right.
